

## October General Meeting Program

Our program is a bit different this month in that we have guest speakers who are not club members. So many of our CUE members have recently visited a Verizon authorized dealer on West Ridge Road that the store manager offered to come to a CUE meeting and talk about smartphones, tablets and cellular service. He and the staff at his store have been most helpful and they know the technology as well as its use. So bring your questions about phones, tablets, service, cost, plans, comparison between cellular providers, etc. to the CUE General Meeting on October 19. This month we're also saying goodbye to Holy Rosary School as we transition to the winter schedule and then to a new home for CUE.

## November General Meeting Program

Lou Cioccio will be presenting a program on Windows 10 Creator, the new update to the Microsoft flagship operating system. November starts our alternate winter schedule so this General Meeting will be held at 2:00 PM at Lifeworks Erie. See you there!
