Struggling with the Mail app that came with Windows 10. Well, you have a few choices if you do not like Mail from Windows 10 and you really miss Outlook or Outlook Express!

I will be demonstrating one of the free email clients, Mozilla Thunderbird, but there are some others:

Please do not get confuse as there are two types: Web mail that you use through your Web Browser (Internet Explorer, Firefox, Google Chrome, Opera etc.) and actual hard written software apps. called mail clients.

Examples are:

- eM Client
- Mailbird Lite
- Claws Mail
- Inky
- Opera Mail
- Mozilla Thunderbird
